Education

Georgia Southern University | B.S Software Engineering (Honors Program)

Anticipated Graduation:

May 2028

GPA: 3.56

President's List: Spring 2024, Fall 2025. **Dean's List:** Fall 2024 and Spring 2025

Coursework: Data Structures, Database Systems, Discrete Structures, Programming Principles I & II

Technical Skills

- Languages & Tools: Java, HTML5, CSS3, JavaScript, Python.

- Core Competencies: Object-Oriented Programming, Data Structures, Algorithmic Problem Solving, Responsive Web Design

-Frameworks & Tools: React, React Router, Git, GitHub.

Projects

AI-Powered Resume Analyzer | React, React Router, Puter.js

February 2026

-Architected a client-side AI-driven resume evaluation system that parses candidate resumes and matches them against dynamically generated job descriptions using rule-based and AI-assisted scoring logic.

-Designed modular React components to handle resume parsing, job listing generation, and ranking pipelines.

-Implemented offline-first functionality to ensure full usability without internet access.

-Optimized state management and routing to enable seamless multi-page navigation and real-time scoring updates.

Personal Portfolio Website | HTML, CSS, JavaScript

FEBRUARY 2026

-Developed a fully responsive portfolio platform using Flexbox and CSS Grid to showcase technical projects and professional experiences.

- Integrated a contact form connected to Google Sheets API to automate submission storage and data tracking.

- Applied mobile-first design principles and DOM manipulation to enhance interactivity and user experience.

Managed version control, commits, and deployment using workflows using Git and GitHub.

Relaxing Game App | Java, Java Swing

March 2025

- Built an interactive GUI-based game using Java Swing and event-driven programming.

- Applied object-oriented design principles to structure game mechanics and UI components.

- Implemented debugging strategies and modular architecture to improve maintainability and scalability.

Grade Tracker App | Java, Java Swing

May 2025

- Engineered a GPA calculator with modular OOP architecture to enable dynamic grade input and real-time academic performance tracking.

- Separated business logic UI layers to enhance maintainability and extensibility.

Experience

Residential Advisor – Georgia Southern University

July 2025 – Present

- Lead programming initiatives for 100+ residents while managing on-call crisis response responsibilities.

- Apply structured problem-solving and conflict resolution strategies in high-pressure environments.

Student Assistant – Dining Commons, Georgia Southern University

Sept 2024 – Nov 2024

- Improved scheduling efficiency for 200+ staff members using Excel-based workflow systems, reducing shift conflicts by 15%.

Personal Assistant – Margrail Limited (International)

July 2022 – Aug 2023

- Coordinated project timelines and documentation across cross-functional teams, strengthening workflow organization and communication efficiency.

Leadership & Involvement

Secretary – Girls Who Code

Aug 2025 – Present

- Coordinate meetings and manage communications to support coding workshops, using organizational tools and clear record-keeping to foster collaboration and increase member engagement.

Member - Society of Women Engineers (SWE)

May 2024 – Present

- Participate in professional development and networking opportunities, leveraging exposure to industry events to strengthen teamwork and leadership skills.

Member - National Society of Black Engineers (NSBE)

May 2024 – Present

- Engage in peer collaboration and career-focused initiatives, building technical knowledge and professional connections through national and local chapter involvement.
